### C. Tax Deferred Income (Item 4)

Generally Tax Deferred Income is not taxable when received. Tax Deferred Income received reduces the capital gains tax cost base of your units. Once the total Tax Deferred Income amounts received by you during the total period you hold your units exceeds your cost base in respect of those units, the excess Tax Deferred Income should be a taxable capital gain.

If you sell your securities, your capital gain or loss should be calculated by subtracting from your sale proceeds, the cost base or reduced cost base of your securities reduced by the total Tax Deferred Income amounts received by you.

## Have you sold your investment?
